Apple owners who participated in the 2024 Harvest Festiv  
(The 2025 harvest festival is scheduled for November 29,30)

Please visit our apple farm and choose the apple tree that calls to you. There is nothing like the joy of watching the growth of an apple tree that you yourself have chosen. Once ripe and harvested After harvesting, we will deliver you fresh, delicious apples from your very own apple tree to any address in Japan. Apples require a lot of care before they are ready to reach your home. Learning about and having an appreciation for apple for about apple cultivation is sure to make your apples taste all the more better. We wish it would be nice to have a relationship like a distant relative.

### What to know about owning an apple tree:

You will be the owner of one apple tree for one season.  
You can participate regularly in farm work and events remotely.  
For the most part, contact will be through LINE.  
You can expect updates once a month.

After choosing your apple tree,  
you can choose a name for it.  
We will make a nameplate  
and attach it to your tree.

## About Otobe Kadoya

(Sasaki orchard)

"Established 100 years ago" -we are the fourth generation. Our predecessors found land suitable for growing apples and developed the fields we have today. As protectors of these fields, our goal is to continue for two hundred years while being proud of our legacy and without fearing change.

### In fact,

Iwate Prefecture is a producer of delicious apples. The conditions for growing delicious apples are: a proper temperature difference between day and night, well-drained soil, and a sloped field with good sunlight. Apples that meet these conditions are sure to put a smile on whoever tries one..

### Our commitment

An environmentally friendly cultivation method that does not use chemical fertilizers. We aim to create sustainable agriculture and a sustainable region so that we can fulfill our responsibility of providing delicious and safe food for the future.

### A delicious apple = a delicious product.

We make the most of the natural flavor of the apples and use as little sugar and additives as possible. A seasonality that you can taste and enjoy!
